Project Management Services

Firenor AS designs, produces, assembles, tests, installs, and performs commissioning on an enormous variety of high quality active firefighting systems for onshore, offshore, and marine industries. Top quality project management is a vital key to the successful delivery of large catalogue of products provided by Firenor. At Firenor, we ensure that project management is performed by individuals that fully understand every aspect of the project management processes. Firenor's project management office (PMO) defines and maintains high quality standards for project management within the organization. We focus on standardizing and following project management policies, processes, and methods. The Firenor methodology is derived from guidelines presented in "A Guide to the Project Management Body of Knowledge" (PMBOK® Guide) which has a focus on:

- Integration Management
- Quality Management
- Procurement Management
- Scope Management
- Resources Management
- Risk Management
- Schedule Management
- Communications Management
- Stakeholder Management
- Cost Management

LIFECYCLE SERVICES

- Progress Report
- Project Evaluation Reports

EXPERIENCE

With a constantly growing worldwide client list, Firenor provides services and firefighting equipment deliveries to several of the largest oil companies, shipyards, and EPC contractors around the world. Our industry experience with national and government regulations from countries all around the world offers an advantage to ensuring customer compliance with those regulations. Customers can rely on our years of experience for all their needs, including delivery of complete firefighting systems for brand new platforms, replacement of worn out systems with compatible modern systems, and upgrading of older equipment.

QUALIFIED PROJECT MANAGERS

Most Firenor project managers have specialized training in the field of project management. Firenor are a mix of PMI's Project Management Professionals (PMPs) and Certified Associates in Project Management (CAPMs). All our project managers are familiar with the multi-discipline engineering processes.
